

## CASE STUDIES

---

10 year old plantar warts resolved within 11 weeks.

After 3 SWIFT treatments, the lesion had completely cleared within 12 weeks.

After years of failed treatments, this patient was pain-free and verruca-free with SWIFT therapy.

Clinic Details:

## WHAT ARE WARTS?

---

Warts are a common contagious infection in the outer layers of the skin which are caused by HPV (Human Papillomavirus).

They can spread to other areas of our body and from person to person.

Warts are generally very difficult to get rid of, as they are excellent at evading the body's immune system.

## WHAT IS SWIFT THERAPY?

---

SWIFT is medical microwave technology that is highly effective at resolving warts, verrucae or papillomas.

A focused microwave signal is emitted into the skin to a predetermined depth to ensure only the wart is treated.

A process called Heat Shock occurs within infected skin cells. This causes the wart to release certain proteins into the circulatory system, allowing the immune system to recognise the infection and begin to fight the virus.

## WILL I FEEL ANYTHING?

---

The rapid heating of the wart to 42-45°C can cause discomfort, however this lasts for only a second. This temperature range is merely a few degrees warmer than a hot bath, and will not cause any serious tissue damage or scarring.

**SWIFT has an 83% resolution rate\*.  
Higher success than any other  
wart treatment.**

## HOW SAFE ARE MICROWAVES?

---

Microwaves are a form of non-ionising radiation, which means that they can not cause damage to the DNA of living things. SWIFT uses very low energy levels that are only able to vibrate water molecules within skin cells.

\* Based on data collected and analysed from post market surveillance July 2017 of trained SWIFT users.

## HOW MANY TREATMENTS WILL I NEED?

---

This is dependent on how you respond to treatment. Most patients require 3 treatments or less. Your Podiatrist will be able to discuss your treatment plan.

## CAN ANYONE RECEIVE THIS TREATMENT?

---

With a few exceptions, most people with skin lesions would be able to have this treatment. Your Podiatrist will carry out an assessment prior to treatment and be able to advise you on this.

## BENEFITS OF SWIFT

---

NO SMOKE

NO ANAESTHETIC

NO DRESSINGS

- Rapid treatment time
- No dressings required
- No need to self-care
- Pain relief post-treatment
- Few treatments needed
- Highly effective
